Hi all!

Club Penguin Island has it's rolling launch of 1.6 starting today! This means this update will be available to 30% of Android users. Expect the "I can't find my friends" again until the forced update (expected next Monday). **Here's the scoop:**

Non-Gameplay updates/known issues:

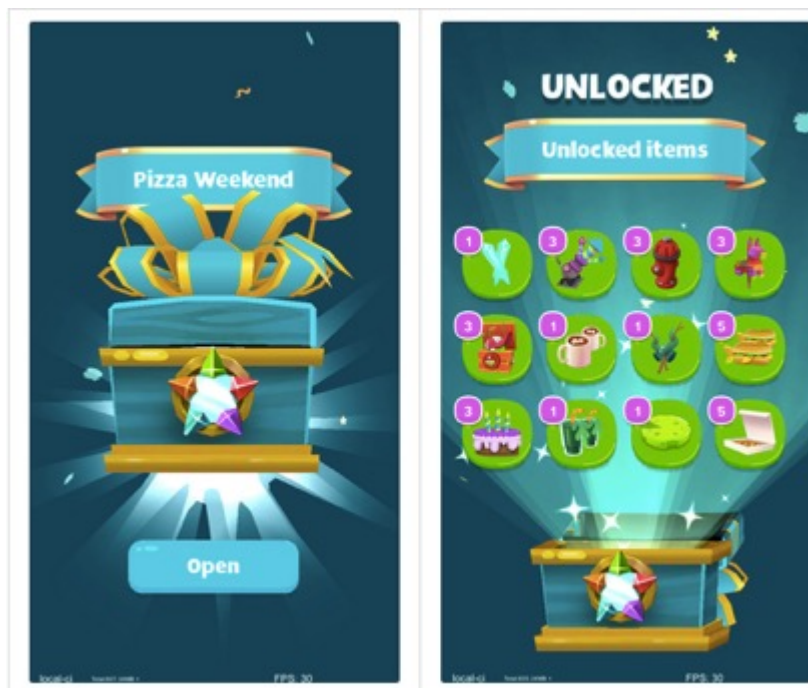

- Guest may notice that the resolution has changed, some features may appear soft, this is a work around to allow for lower spec devices to crash less while the long term solution is worked on
- Purchasing issue: some people are getting stuck at the age gate even when entering an adult's DOB. See article "[CPI - The age is disappearing when I try to buy membership](#)" for more details

New Party Game: Find Four – Prehistoric Penguin Style

- 2 player game – Membership needed to purchase
- First player is randomly chosen
- Player wins when they achieve four of their pieces in a horizontal, vertical or diagonal row
- Each player has ~10 seconds to decide which column to drop their game piece into. If time runs out the game piece is automatically dropped into the currently selected column
